FOREWORD

It is strange there should be so much majesty in a word clothed in the habiliments of humility. Yet instinct in every one of us is the urge to serve humanity. Under the banners of SERVICE all of us want to march. And not to man alone is this urge confined. The warm rains which clothe the hills with verdure in the spring; the ceaseless tides which ebb and flow forever in the seven seas; the winds that blow from pole to pole; the soaring skylark and its matchless song—are all of them instinct with that thought of SERVICE which permeates the universe.

It was SERVICE which sent the gleaming galleons forth to sea; which led Columbus across the dreary wastes of waters to another and a newer world; it is SERVICE which has conquered sickness and disease and will yet conquer war; which has led people out of slavery into the light of liberty; which has built nations and cities, religion and culture.

Emblazoned, therefore, upon the coats of arms of all of us is the legend ICH DIEN—I serve. SERVICE is a golden thread that runs not only through the hearts of men, but through hills and mountains and valleys, through rivers and seas, through suns and moons and planets, out into the unseen depths of the universe, far out and beyond, until at last it rests in the hands of the Source of Power Itself.

Neither man nor industry can progress or live without SERVICE. As one more contribution to SERVICE, therefore, we dedicate to the Lighting Industry this catalogue and the idea which it contains. It is so far the culmination of our SERVICE—but it is not the end. Other needs will bring new demands, for Progress is infinite. But today our SERVICE is in the van of Progress and we shall try to keep it there.

GILLWAY UNITS

We believe that no service is wholly satisfying unless it is complete. It was in recognition of this fact that some years ago we inaugurated among glass factories a new idea—the packing of illuminating glassware in corrugated cartons, with the consequent elimination, in great part, of breakage and the annoyances incident thereto. It was in further recognition of this fact that subsequently we were the first to cancel the package charge, notwithstanding a notable improvement in the manner of packing lighting glassware; and two years ago in our laboratories here, after years of concentrated experiment and research, we perfected the most efficient lighting glass ever developed—HYPERION GLASS.

And now, to meet a new need which has arisen and become acute—for progress is constant—we offer to the Lighting Industry a further service—materialized in GILLWAY UNITS. This new service is based upon the belief that the Lighting Industry ought to be able to purchase, at a reasonable and competitive price, LIGHTING EQUIPMENT from ONE SOURCE as ONE THING. Consequently, we who were formerly manufacturers of lighting glassware only, are now, in addition, manufacturers of lighting equipment also. In other words, we make available to the Lighting Industry—to those members of it who are in need of this service—not glassware only, but glassware and fixtures as one thing, WIRED, ASSEMBLED AND PACKED IN INDIVIDUAL CARTONS—READY TO INSTALL. We shall, of course, continue to offer to the Industry glassware* only, as heretofore, but in our GILLWAY UNIT DEPARTMENT we offer also the completed product—we offer not only glassware but lighting equipment as well.

And what does such a service mean? It means conservation of stock room, elimination of dirt, of breakage, and of wasteful shop labor costs. It instantly and effectively removes from the Lighting Industry its most persistent and substantial annoyances. It means that hereafter there is no need on the part of any member of the industry to purchase his glassware from one source, the component parts of the unit from numerous others—bring them into his warehouse and there, at considerable trouble and expense, assemble them into the complete product.

One would not think, for example, of purchasing the component parts of incandescent lamps from various sources—the glassware from one, the metal base from another, the filament from a third, with consequent delay, trouble and expense.

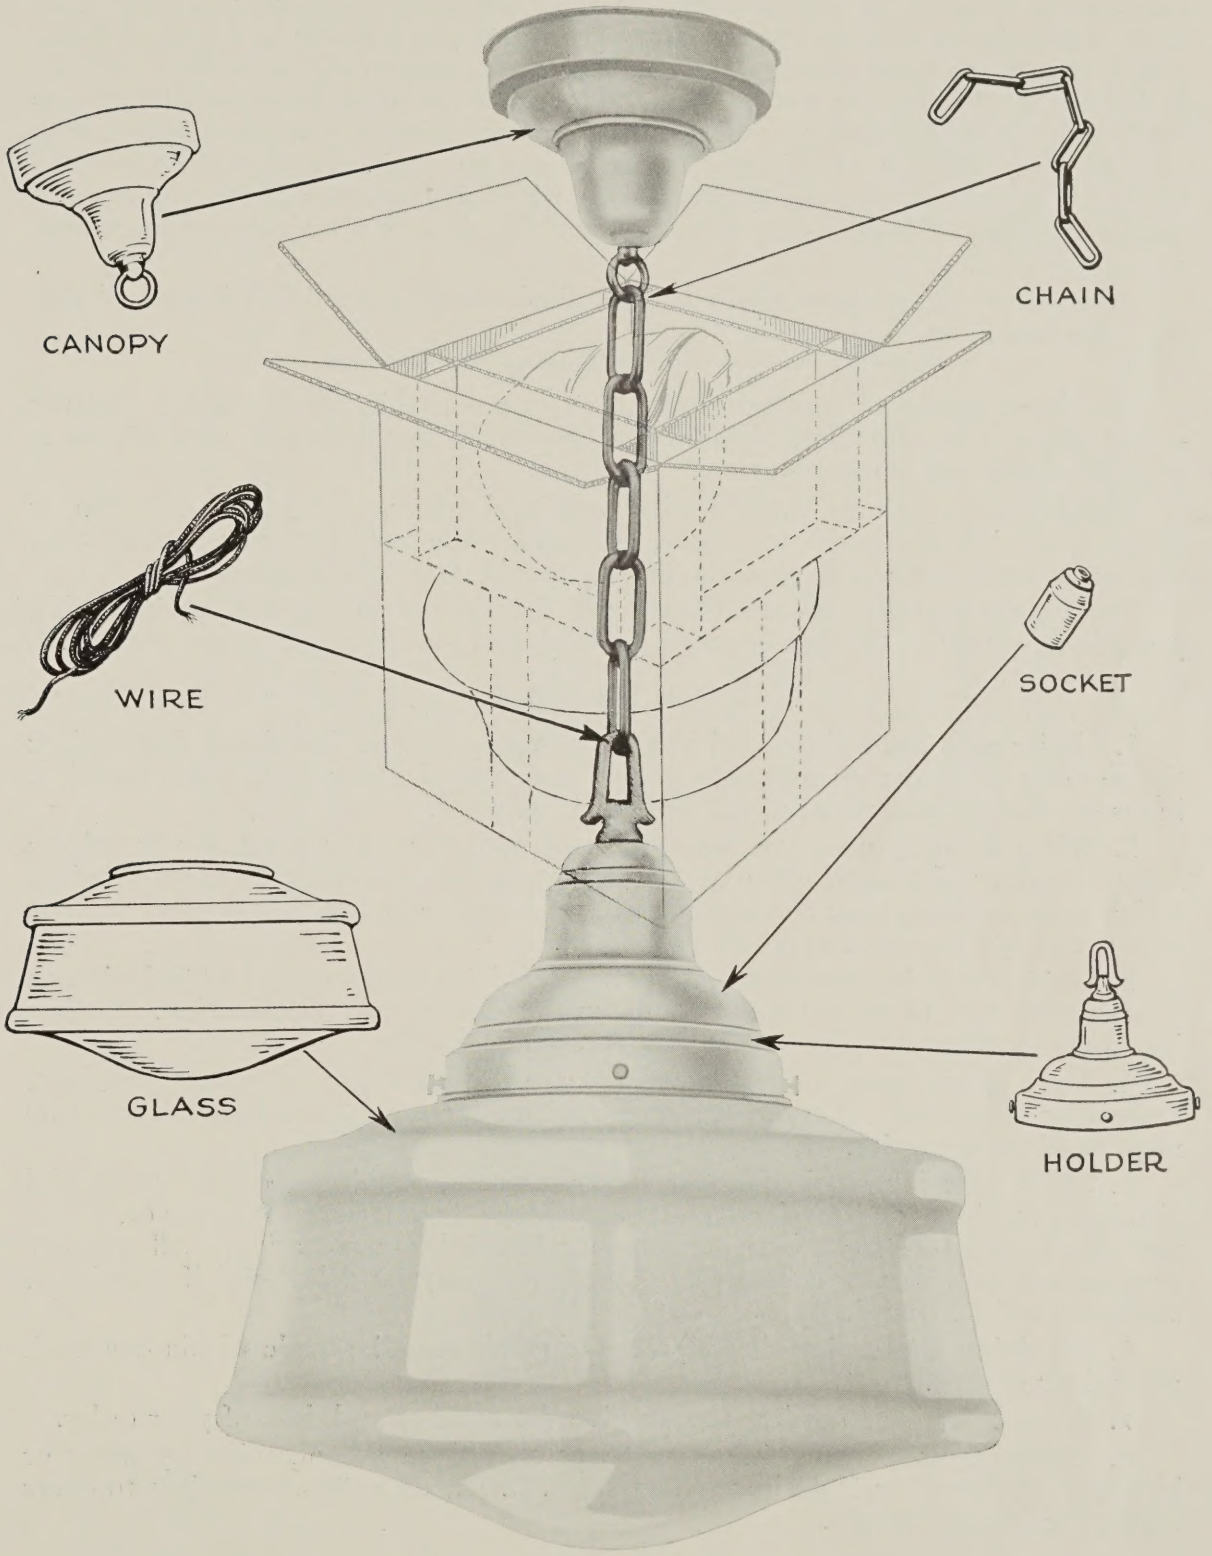
In other words, the Lighting Industry can purchase lighting equipment from us as it now purchases incandescent lamps—as a unit, intact, and sell them in that way. It is possible to order one unit, ten units or a thousand units—and each and every one of them is wired, assembled and packed in individual cartons, ready to install.

In the pages of this catalogue are illustrated commercial and residential GILLWAY UNITS suitable for every demand of illumination. They are composed of Hyperion—the most efficient lighting glass ever developed and attractive and substantial fixtures. We invite the most careful analysis and investigation of their merits and of their significance—the concrete materialization of an idea and of a service.

GILLWAY IS THE HIGHWAY TO SUCCESS

*We do not sell fixtures alone. If glassware, illustrated in this catalogue, is desired without fixture, refer to our general catalogue No. 13, illustrating our complete line of glassware only.

Difference between the Old-way and the Gillway



THE OLD-WAY—Lighting Equipment built up from many things, secured from many sources.
THE GILLWAY—Lighting Equipment obtainable from one source as one thing.

Each Gill-Way Unit is wired and packed complete with Glass in an individual carton

Wiring Specifications

All *Gillway Units* listed on the foregoing pages of this catalogue are equipped with wire and sockets approved by the National Board of Underwriters. The sockets are installed in and attached to their respective holders; the wire in all cases is attached to the socket, one strand of which has a tracer to denote polarity and both strands laced through the chain (if suspension type) to canopy, with six inches extra wire, beyond end of stem. On such units as is necessary hickeys are furnished; on others, such as ceiling types, crossbars and screws are supplied with exception of Number 14 Kitchen Units shown on page sixteen and Number 10 Ceiling Units shown on page twenty-two, both of which items, being highly competitive, prohibit the supplying of bars, especially since in a majority of cases they are superfluous.

In other words, *Gillway Units* are supplied complete ready to install. "Just send the carton on the job."

Finishes

The finest grades of Enamels and Lacquers are used in our Enameled Finishes —and applied by the most modern and approved methods and each article is carefully inspected before shipping.

These finishes can be washed with soap and water. They will not chip or crack except when exposed to intense heat and while even under such conditions, flaking is improbable, it is possible and cannot be guaranteed against.

Our Plated Statuary Bronze Finish is of the highest quality and workmanship possible to obtain in the most completely equipped plating plant in the country.

How To Order

1. Under each item illustrated in this catalogue will be found full description: the number of holder or hanger; number and size of glass; and, if decorated, a letter to denote decoration, also; finish and list price.

2. When ordering use care and specify: *first*, the number of hanger or holder; *second*, number of glass if plain, and if decorated, the number and letter following, which denotes decoration; *third*, the finish (we do not sell hangers or holders without glass); and *last* the price at which it is listed.

3. Orders on which specifications are not definitely clear cannot be filled without considerable loss of time consumed in writing for needed information. Follow instructions when ordering and facilitate prompt service.

4. State clearly how the goods ordered are to be shipped, whether by freight, express or otherwise. If there is any preference for a certain route, it should be mentioned on the order.

5. Great care is used in filling orders promptly, packing goods properly and obtaining receipts from carriers for delivery in good condition. We cannot, therefore, be responsible for goods damaged or lost in transportation. All possible precautions, however, will be used to prevent injury or delay and if requested, shipment will be traced.

6. All claims concerning the shipment of goods must be made within one week after their receipt.

7. When referring to orders always give the number and date of your order.

8. Orders from persons unknown to us should be accompanied by draft or business references, or, if desired to be sent C. O. D., an amount sufficient to cover express or freight charges.

GILL GLASS COMPANY, INC.

PHILADELPHIA, PA., U. S. A.

GILLWAY UNITS

Each Gill-Way Unit is wired and packed complete with Glass in an individual carton

HYPERION GLASS

Everything as One Thing—Packed Complete—Ready to Install

Wiring Specifications

No. 30 Hanger

Brass keyless socket No. 16 slow burning wire.

No. 31 Hanger

Edison base porcelain socket and No. 16 slow burning wire.

No. 32 Hanger

Mogul base, porcelain socket and No. 14 slow burning wire.

No. 15 Ceiling Ring

6″ dia., 4¼″ deep. Pigtail porcelain receptacle and crossbar.

No. 33 Ceiling Ring

8″ dia., 5″ deep. Equipped with pigtail receptacle and crossbar.

Can be furnished with asbestos wire at 20c list per unit additional.

This Unit is designed and priced to meet general requirements of commercial illumination.

Wired and packed complete in an individual shipping carton.

Finished in Bronze Enamel or White Enamel

(Specify finish desired)

Hanger illustrated with Levolier Switch can be furnished with any shape of Glass of corresponding size Fitter shown in this catalogue by specifying Number of Hanger and Number of Glass wanted.

Note. The Canopy is attached to ceiling by means of cross-bar screws and lugs, doing away with slip ring canopy and stem. This type is more rigid, is easily installed and holds securely to any type of outlet.

Each Gill-Way Unit is wired and packed complete with Glass in an individual carton

Specifications for Standard Types of Commercial Units

On pages 6, 7, 8 and 9 is shown a line of ceiling and suspension type units of competitive type. The holders and canopies are made of 24 B. & S. gauge brass—a weight and quality sufficient to meet general requirements in commercial lighting though where architects' specification calls for 22 gauge brass these will not answer. They are finished in an enameled statuary bronze or enameled white of superior quality—will not tarnish and can be washed with soap and water.

Where 22 gauge brass is required by architect, builder or government specifications, we refer you to pages 11, 12, 13 and 14, illustrating hangers of our own exclusive design, made from standard 22 B. & S. gauge brass and finished in the finest plated statuary bronze possible to produce. Both the chain and stem type of suspensions are shown, the former for general and the latter for school lighting use.

The dealer need have no hesitation in recommending these hangers and Hyperion glass to meet the most exacting requirements so far as quality, finish and efficiency are concerned.

HYPERION GLASS

Everything as One Thing—Packed Complete—Ready to Install

Specifications

Canopy and holder made of 22 B. & S. gauge brass.

No. 40 and 42 wired with No. 16 slow burning wire and Edison base porcelain socket.

No. 41 and 43 wired with No. 14 slow burning wire and mogul base porcelain socket.

Can be furnished with asbestos wire at 20c list per unit additional.

This hanger is designed and built to meet the most rigid specifications of architect and builder. Hyperion glass meets all requirements.

Wired and packed complete in an individual shipping carton.

Finished in Heavily Plated Statuary Bronze only

In Response to an ever Increasing Demand for Safety or Screwless Holders for Units

We show on pages 16 and 17, our own exclusive design, strong, dependable and safe *screwless holder* made of 22 B. & S. gauge brass, the canopy of same gauge. We have adopted the "*Onli*" type because we believe it is just what its name implies, the only real, safe, screwless holder on the market; also because it is a safety or screwless holding device which has been approved by the *National Board of Fire Underwriters.* Many so-called screwless holders being sold are neither screwless, safe or practicable, while the "*Onli*" positively meets all these requirements plus many other features.

This type of unit holder has long been recognized by the entire lighting industry as the most desirable. No battered screwheads to wrestle or hurt the fingers, no defective bushings to twist out, no danger of breakage because screws have been too tightly inserted against neck of glass to allow for natural expansion and contraction. But most important of all on large installations where it is essential to clean glass frequently in order to maintain its maximum efficiency, the janitor can remove and clean the globe in half the time consumed where the screw type is employed and with practically no risk of breakage.

The answer to—"Why hasn't it been universally used?" is price. Heretofore, the price of screwless holders has been so much higher than the screw types that its advantages have been obscured by the cost factor. By assembling, wiring and packing hanger and glass in one factory under one roof, we are able to offer this greatly improved type at just a few cents more per unit than the most inexpensive and competitive lighting unit on the market.

This improved holder is shown in ceiling and both stem and chain suspension types. It meets every requirement of architect, builder and the National Board of Fire Underwriters. It is finished in heavily plated statuary bronze, and while it is illustrated here with only two shapes of glass, it can be furnished with *any* Hyperion Luminaire of corresponding size fitter. For the perfect installation, large or small, recommend "*Onli*" *screwless holders—safe—secure—economical—attractive.*

HYPERION GLASS

Everything as One Thing—Packed Complete—Ready to Install

Canopy and patented Screwless holder made of 22 B. & S. gauge brass.

No. 58, 60, 62 and 66 wired with Edison porcelain socket and No. 16 slow burning wire.

No. 59 and 61 wired with mogul base porcelain socket and No. 14 slow burning wire.
